Subject: microsoft settlement

I am a computer user who always felt I was able to purchase any software program I wanted. I have not felt that Microsoft has prevented me from doing this in any way. In my opinion the lawsuits are just screwing up the consumer by doling out multi dollars to the States. They are not interested in the consumer, they are looking for all the cash-cows they can find so the politions and the lawyers can benefit. Don' hurt us consumers any more by awarding any more funds that Microsoft has to pay to the States. Enough is enough.

A. E. Williamson
